

# PAYTR BKM EXPRESS INTEGRATION

## BKM EXPRESS INTEGRATION

BKM Express Integration automatically appears on the payment screen in the iFrame payment method. However, when performing BKM Express integration in Direct API solution, \$payment\_type = "bex" must be sent.

Field name / Type	Explanation
merchant_id	Store number
merchant_key	Store Password
merchant_salt	Store Secret Key
merchant_oid	Order Number
payment_amount	Payment Amount: Amount information for the order.
user_ip	IP address received from the user
email	User email address
payment_type	For Bkm Express must sent as "bex".
installment_options	Installment options are optional. If you do not send it, your customer will not be shown the installment options. The values given below are examples. You should calculate the amounts according to your commission rates and edit the following section.
