

# RETURNING PAYMENTS SEND FROM ACCOUNT

PAYTR Returning Payments - Send From Account API Document Versions		
Version 1.0	Document Created	18.06.2020

With this service, a transfer request has been made but you can send a payment request for the returning payments due to the buyer account error. Returned payments are processed as a balance to a subaccount for your store. You can access the list of these reimbursed payments with the “Returning Payments - List API” service.

- 1- To send payment transfer from the account, send the information specified in the table to the URL related to POST: <https://www.paytr.com/odeme/hesaptan-gonder>

Mandatory	Description	Field name / type
✓	Merchant No: Merchant number given to you by PayTR	merchant_id (integer)
✓	Transfer ID: The <b>unique</b> transaction number you set for the transfer transaction.	trans_id (Up to 64 characters, alpha numeric)
✓	Transfer Information: Content in JSON format containing transfer amount, recipient name and IBAN values. (See sample code for how to define it)	trans_info(JSON)
✓	PayTR Token: The value you create to make sure that the request comes from you and that the content has not changed (See sample code for calculation)	paytr_token (string)

- 2- Your request will be returned in JSON format.
- If the request is valid, the status number returns the transaction number you sent in the **success** and **trans\_id** field.
  - If you have an error in the query, the status value returns an **error**. In this case, you should check the **err\_msg** content for the error detail.
- 3- After receiving the success response, your request to send from the account will be successfully received by the PayTR system. The PayTR system will process your request in an average of 5 minutes, check the trans\_info content you send, and make the transfers. If incorrect information is detected during the check, the relevant transaction is marked as unsuccessful. The resulting result is notified by POST to the address you defined as **PayTR Mağaza Paneli > Ayarlar > Platform Transfer Sonucu Bildirim URL** in JSON format. Please review the sample codes ([paytr\\_back\\_donen\\_odeme\\_callback\\_example.php](#)).
